

Claims

What is claimed is:

1. Flying Disk Accessory comprising:
 - a C shaped member;
 - a handle member;
 - said handle member having a gripping portion at one end and an attached elongated rod shaped at the opposite end
 - the end of said rod portion of said handle member joined to said C shaped member at the lower portion of said C shape;
 - said C shape having a U shaped cross section where the legs of said U shape are facing toward the center of said C shape;
 - said C shape having a spring biased hinged joint near the junction of said C shape so that the said rod portion is fixedly joined to the lower portion of said C shape ; and
 - said C shape ends each curving outwardly in the opposite direction of the curve of the main body of the C shaped member.

2. Flying Disk Accessory as claimed in claim 1 wherein said handle member includes a hinge pin midway along the handle so the the handle may fold during shipping and storage.

3. Flying Disk Accessory as claimed in claim 1 wherein said rod portion of said handle member includes a standard telescoping function that allows the handle to extend or retract according to the size and skill level of the user.
